Subject: Microsoft Settlement

Concerning the current United States v. Microsoft antitrust case: I have read over the Stipulation and Revised Proposed Final Judgement of 11/06/2001, and am NOT in favor of it in its current state. The settlement does not, in any way, penalize Microsoft for its past infringements of the law. For many years, OEMs have been under control of this corporation, and simply "formalizing" this law in a document is not enough. Microsoft has been declared guilty of past wrongs, and must now be held accountable in some measure. The current proposed settlement is unacceptable.

Thank you,
John H. Hammond
